

Successful Security Assessments

This letter serves to confirm that **Not The Hidden Wiki** Project (NTHW) has successfully carried out penetration testing and red teaming activities for CypSec Group ("CypSec"), within the scope of a comprehensive cybersecurity assessment conducted in 2025.

The engagement included:

- Targeted penetration testing of CypSec web applications and associated infrastructure
- Identification and documentation of security vulnerabilities and configuration weaknesses
- Delivery of a detailed technical and management-level report with remediation guidance
- Execution of retesting procedures to verify CypSec's security effectiveness and maturity

Throughout the engagement, NTHW demonstrated a **methodical, standards-based approach**, aligning with best practices in vulnerability assessment, exploit validation, and reporting. Their team exhibited **strong technical competence, clear communication, and a mature understanding of enterprise-grade security requirements**.

CypSec particularly values the **professionalism, integrity, and responsiveness** shown by NTHW during all project stages. The collaboration was efficient and transparent, and all deliverables were of high quality and directly applicable to strengthening our security posture.

Following the successful completion of the initial assessment, **continuous penetration testing and security verification activities have been established** in cooperation with NTHW, covering CypSec's core infrastructure, including cypsec.de and its security software solutions deployed at cypsec.de/tool-suite. These ongoing engagements ensure that security assurance remains an integral part of CypSec's operational environment.

Based on this engagement, CypSec confidently recommends Not The Hidden Wiki Project as a reliable partner for conducting advanced penetration testing, red teaming, and related security assurance services.

Signed on behalf of CypSec

Frederick Roth

Chief Information Security Officer
